Education

- Dr. APJ Abdul Kalam Technical University, B.Tech, 2022-2026

Technologies

Languages: JavaScript, Python, HTML, CSS, PHP

Frontend: React.js, Next.js, React Native, Electron.js, Expo, Tailwind CSS, Bootstrap, Aceternity UI

Backend: Node.js, Express.js, Hono.js, Django, Fast API, Firebase, MongoDB, MySQL, PostgreSQL, RESTful APIs

AI/ML: Langchain, RAG, LLM Fine-tuning, Hugging Face, VectorDB, Pytorch, Unsloth

Tools & DevOps: Git, Google Colab, Cursor, Copilot, CI/CD, DevOps, Agile/Scrum, AWS/Azure/GCP, Testing Frameworks

Experience

May 2025 – Present

Intern, Rudranex Omniverse – Full Stack + AI Developer

- Created responsive, high-performance web applications using React.js and Next.js, integrating Aceternity UI to enhance user engagement by 35%.
- Integrated Langchain and OpenAI APIs to automate context-aware user workflows, reducing user task completion times by 35%.

May 2025 – Present

Intern, Maintonia – Full Stack + AI Developer

- Architected RESTful APIs and structured database schemas using Django and PostgreSQL to handle concurrent client requests.
- Built semantic search and RAG pipelines using Langchain, Vector databases, and Unsloth-optimized LLMs, decreasing system latency by 30%.

Oct 2024 – Feb 2025

Intern, Centennial Infotech – Full Stack Developer

- Led the development and deployment of e-commerce platforms using Node.js and Express.js, integrating secure payment gateways.
- Optimized backend server routes and database queries, boosting page-load speeds by 25% and daily active users by 40%.

Apr 2025 – May 2025

Intern, Sky Shine Technologies – Full Stack + AI Developer

- Engineered real-time chatbot platforms using the MERN stack and WebSockets, enabling instant messaging between agents and users.
- Embedded Langchain memory modules to persist context in chatbots, increasing response accuracy by 45%.

Projects

May 2025 – Jun 2025

AI-Enabled Gmail Replier

- Engineered an email automation tool using Next.js and Langchain that drafts and sends 500+ contextual replies/hour with 85% accuracy.
- Designed a real-time dashboard for email categorization, reducing manual inbox triage time by 60%.

Dec 2024 – Feb 2025

Narad – AI News Platform

- Built a high-traffic news platform using React.js and Node.js that aggregates and summarizes 100+ articles/minute using Gemini AI.
- Integrated Google Search API for automated fact-checking and cross-referencing, enhancing news validation accuracy to 90%.

Achievements

- Led a team in a national-level hackathon, securing a spot in the Top 100 out of 5,500+ competing teams.
- Shipped a full-featured hotel-listing web platform as a freelancer on Upwork, achieving 100% client satisfaction.
- Selected as an open-source contributor for GirlScript Summer of Code (GSSoC), contributing to core web repositories.
